-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 30 August 2004.  
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 9-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected claimed invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 08-30-04.

### ***Claim Objections***

Claim 2 is objected to because of the following informalities: claim 2 cannot depend upon itself. It is assumed that applicant intended claim 2 to depend upon claim 1. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yee et al. [US 6,512,192] in view of Michetti [US 4,019,005].

Regarding claims 1, 5-6 and 8, Yee et al. disclose a gas separator barrier [14] comprising:

- a plurality of parallel segregator fins [figure 3, 60, 57];
- a transverse dividing member [figure 3 and figure 5] structured to divide the parallel segregator fins into a first portion and a second portion;

- a plurality of exhaust channels [34, 35, 36] formed between the segregator fins of the first portion; and

- a plurality of gas ducts [100, 102, figure 5] disposed between the parallel segregator fins of the second portion.

Yee et al. disclose everything claimed except a baffle mounted within the dividing member.

Michetti discloses the use of a baffle member having a plurality of holes [71a] used in an exhaust duct of a circuit breaker.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to include baffles in the dividing member of Yee et al., as suggested by Michetti, for the purpose of dispersing arc gases.

Regarding claims 3-4, Yee et al. discloses the ducts structured to segregate and direct the arc gases [figure 6].

Regarding claim 7, the specific material used for the barriers would have been an obvious design consideration based on the rating and application of the breaker.

### ***Allowable Subject Matter***

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

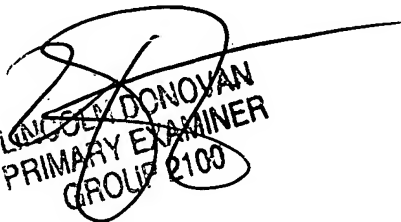

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lincoln Donovan whose telephone number is 571-272-1988. The examiner can normally be reached on M-F 8-5.
